

Mark Kenny and The Hippo Show A/V and Stage Requirements

The following are the audio/visual requirements for Mark's keynote presentation. These are not absolute requirements but highly recommended to ensure a fantastic experience for the audience:

1. Four wireless lavalier microphones (one for Mark and three for the characters).
2. One to two hand-held wireless microphones (two microphones are preferred for audiences over 100 people). These microphones are for audience engagement.
3. All microphones need to work anywhere in the room. This allows for the facilitator and characters to interact with the audience at times during the presentation.
4. Three chairs and one table placed on stage. These will be used by the characters in the show for an office setting. It is not necessary to have a *real* office desk and office chairs.
5. A lectern is not required and can interfere with the presentation. Please move the lectern off stage prior to Mark's presentation. If this is not possible, please inform us as soon as possible so that we can adjust positioning and logistics to ensure an optimal experience for all audience members.
6. Full house lights available during portions of the show where the audience participates.
7. Mark does not use PowerPoint slides for keynote presentations.
8. Please provide 8 water bottles for Mark and his team.

Use of audio and video recordings is prohibited without written permission from Hippo Solutions, Inc.
